Strowes

# Subtrack: Vantage Point Selection

- This time we organized a short subtrack about vantage point selection
  - The first 30 min of the session
  - Vantage point selection is key in both passive and active measurements
- After we will resume with presentations about tools and analysis
- The audience of MAT is a healthy mix of operators and researchers/academics
  - We looked for presentations appealing for both
  - We asked our presenters takeaways/guidelines resulting from their research which could guide the current and the future Internet development
  - We look for your feedback: [mat-wg-chairs@ripe.net](mailto:mat-wg-chairs@ripe.net)

# Agenda

<b>Time (UTC+2)</b>	<b>Presenter</b>	<b>Title</b>
09:00	<b>WG Chairs</b>	Welcome
